

**PREVALENCE AND SIGNIFICANCE OF CALCIUM,  
VULNERABLE PLAQUE AND PLAQUE MORPHOLOGY  
IN  
PERIPHERAL ARTERY DISEASE (PAD)**

## Table of Contents

INTRODUCTION .....	7
LESION CLASSIFICATION SYSTEM .....	7
CALCIUM .....	8
Vascular Calcification Process .....	8
Atherosclerotic Calcification (Intimal) .....	9
Medial Artery Calcification (Monckeberg) .....	9
Difficult to Distinguish Between Intimal and Medical Calcification .....	10
MEASUREMENT OF LESION SIZE AND PLAQUE COMPONENTS .....	10
Histology .....	10
Angiography Has Limitations .....	11
Intravascular Ultrasound (IVUS) .....	12
IVUS with Virtual Histology (VH) .....	12
Computed Tomography Angiography (CTA) .....	13
Cardiovascular Magnetic Resonance (CMR) Imaging .....	13
DEFINITION OF CALCIFIED LESION .....	13
American College of Cardiology Foundation (ACCF) and American Heart Association (AHA) on Lesion Calcification .....	13
Society for Vascular Surgery (SVS) Reporting Standards for Endovascular Treatment of Chronic Peripheral Artery Disease .....	13
Peripheral Academic Research Consortium (PARC) Lesion Calcification System .....	14
Peripheral Arterial Calcium Scoring System (PACSS) .....	14
Fannelli Calcium Classification System .....	15
Too Many Calcium Scoring Systems for Lower Limb Lesions? .....	16
PREVALENCE OF VASCULAR CALCIFICATION IN PERIPHERAL ARTERY DISEASE .....	16
Prevalence in Clinical Trials .....	16
General Prevalence .....	17
Prevalence in Symptomatic and Asymptomatic Patients .....	17
Prevalence in Patients Undergoing Amputation or Revascularization .....	17
LESION COMPONENTS AND MORPHOLOGY MEASURED BY HISTOLOGY, MRI AND CT .....	18
ABOVE-THE-KNEE PLAQUE MORPHOLOGY AND COMPONENTS IN INTERMITTENT CLAUDICATION, REST PAIN AND MINOR TISSUE LOSS .....	18
Superficial Femoral Artery (SFA) Calcification and Morphology .....	18
Lesions by AHA Type .....	18
Lesion Characteristics and Components .....	19
Calcification in Superficial Femoral and Common Femoral Arteries .....	19
Plaque Characteristics Associated with Restenosis in Superficial Femoral and Common Femoral Arteries .....	20
Superficial Femoral Artery Plaque in Intermittent Claudication .....	20
Superficial Femoral Artery Plaque Size and Composition .....	20
BELOW-THE-KNEE PLAQUE MORPHOLOGY AND COMPONENTS IN INTERMITTENT CLAUDICATION, REST PAIN AND MINOR TISSUE LOSS .....	21
Tibial Artery Calcification .....	21

Factors Associated with Increased Calcification .....	22
<b>LESION MORPHOLOGY IN CRITICAL LIMB ISCHEMIA WITH GANGRENE</b>	
<b>(RUTHERFORD 6) .....</b>	<b>22</b>
Histological Study in “Normal Appearing” Popliteal and Tibial Arteries .....	22
Calcium and Concentricity Increased in Tibial Arteries.....	23
Plaque Composition in Diseased Popliteal and Tibial Arteries .....	23
Calcification Increases in Distal Arteries .....	23
Tibial Arteries Harvested from Amputees .....	24
<b>HISTOLOGICAL ANALYSIS OF PLAQUE AND CALCIUM AFTER AMPUTATION FOR</b>	
<b>SEVERE ISCHEMIA .....</b>	<b>25</b>
Soor Study—Medical Artery Calcification in 76% of All Lower Limb Arteries.....	25
Degree of Atherosclerotic Stenosis Associated with Vessel Size .....	26
Severity of Medial Artery Calcification .....	26
O’Neill Study—Predominance of Medial Artery Calcification .....	27
Prevalence of Bone in Heavily Calcified Arteries .....	28
<b>LOWER EXTREMITY CALCIFICATION ASSOCIATED WITH AMPUTATION AND ALL-</b>	
<b>CAUSE MORTALITY .....</b>	<b>28</b>
<b>OLDER AGE AND SPECIFIC DISEASES ASSOCIATED WITH CALCIFIED ARTERIES</b>	
<b>.....</b>	<b>29</b>
Kidney Disease .....	29
Calcification Present in 40% to 70% of End Stage Renal Dialysis Patients .....	29
Calcification Related to Diabetes in Kidney Dialysis.....	30
Diabetes and Calcification .....	30
Calcification in Diabetics with Moderate Kidney Disease .....	30
Different Disease Pattern in Diabetics with Abnormally High ABI.....	30
<b>CONTRADICTIONARY RESEARCH CONCLUDES THAT THE MAJORITY OF CRITICAL</b>	
<b>LIMB ISCHEMIA LESIONS ARE NONATHEROMATOUS .....</b>	<b>30</b>
Unique Patient Subset with Minimal Atherosclerosis in Soor Histological Analysis ..	31
<b>WHY ARE THERE CONTRADICTIONS IN RESEARCH ON CALCIFICATION IN</b>	
<b>PERIPHERAL ARTERY DISEASE? .....</b>	<b>31</b>
<b>CALCIUM IMPACTS ENDOVASCULAR OUTCOMES .....</b>	<b>32</b>
Calcium Removal or Modification May Enhance Drug-Eluting Balloon Efficacy.....	34
Experimental and Preclinical Studies .....	34
Combining Atherectomy and Drug Eluting Balloons.....	34
Large Randomized Trials Needed .....	34
<b>PLAQUE MODIFICATION OR REMOVAL MAY HAVE THE POTENTIAL TO IMPROVE</b>	
<b>PROCEDURAL SUCCESS AND LONG TERM OUTCOMES.....</b>	<b>35</b>
Improved Endovascular Procedure Success .....	35
Longer Term Outcomes .....	36
<b>UNIQUE CHARACTERISTICS OF HEAVILY CALCIFIED FEMORAL PLAQUE</b>	
<b>HIGHLIGHT NEED FOR SPECIFIC DEVICES TAILORED TO TREAT PERIPHERAL</b>	
<b>ARTERY DISEASE .....</b>	<b>36</b>
<b>CHRONIC TOTAL OCCLUSIONS (CTOs) .....</b>	<b>37</b>
Definition .....	37
Composition.....	37
Prevalence .....	37

CTO Characteristics in a Single Center Study with Crosser Device .....	38
Severity of Calcification in the Occlusion .....	38
Prevalence of Calcification in Entry and Exit Vessels .....	39
Prevalence of Calcification in Caps .....	39
Superficial Femoral Artery Occlusions .....	39
Characteristics of Progressing Lesions in the Superficial Femoral Artery .....	39
VULNERABLE PLAQUE .....	40
Definition .....	41
Role of Calcium in Plaque Stability and Rupture .....	41
PLAQUE SIZE AND VULNERABILITY PREDICT CARDIOVASCULAR EVENTS IN CORONARY AND CAROTID ARTERIES.....	42
VULNERABLE PLAQUE IN THE LOWER LIMB ARTERIES.....	42
High Prevalence of Advanced Lesions in Superficial Femoral and Common Femoral Arteries .....	42
Presence of Lipid Rich Necrotic Core (LRNC) Plaque in Peripheral Artery Disease..	42
Lipid Rich Necrotic Core Plaque Associated with Clinical Peripheral Artery Disease Events .....	42
Plaque Rupture Relatively Common in More Proximal Arteries .....	43
Plaque Components and Prevalence of Thrombus .....	43
Predictors of Plaque Rupture .....	44
Plaque Rupture and Adverse Cardiovascular Events.....	44
Intraplaque Hemorrhage in Femoral Lesions .....	44
More Unstable Characteristics in Femoral Plaques than Carotid Plaques.....	45
Have Femoral Plaques Become More Stable Over the Last Decade? .....	45
PLAQUE MORPHOLOGY AND COMPONENTS PREDICT CARDIOVASCULAR EVENTS .....	45
TIBIAL ARTERY CALCIFICATION—MARKER FOR PERIPHERAL ARTERY DISEASE SEVERITY .....	46
SFA PLAQUE BURDEN AND ECCENTRICITY MAY PREDICT EARLY DISEASE AND CRITICAL LIMB ISCHEMIA.....	46
THROMBUS .....	46
Another Understudied and Underdiagnosed Problem .....	46
IVUS-VH Not Sensitive for Identifying Thrombus.....	47
Presence in Anticoagulant Studies.....	47
Prevalence Based on Vulnerable Plaque and Intraplaque Hemorrhage.....	47
Thrombus Interferes with Drug Diffusion .....	47
CALCIUM CONCLUSIONS .....	47
Calcification in Above Knee Arteries.....	47
Calcification in Below Knee Arteries .....	48
Calcification and Disease Severity .....	49
Calcification and Atherosclerotic Risk Factors .....	50
What is the Real Prevalence of Calcium?.....	50
CONCLUSIONS REGARDING CHRONIC TOTAL OCCLUSIONS.....	51
Above Knee Occlusions.....	51
RESTENOSIS CONCLUSIONS.....	51
CONCLUSIONS: ECCENTRIC AND CONCENTRIC LESIONS .....	51

CONCLUSIONS: VULNERABLE PLAQUE .....	53
NUMBER OF SYMPTOMATIC PATIENTS WITH CALCIFIED ARTERIES .....	53
Total Number of Symptomatic Patients with Intimal Calcification in the Lower Limb Arteries .....	54
Total Number of Symptomatic Patients with Medial Artery Calcification in the Lower Limb Arteries.....	55
Number of Patients with Severe Calcification.....	55
NUMBER OF CALCIFIED LIMBS IN SYMPTOMATIC PATIENTS .....	56
Number of Limbs with Intimal Calcification.....	56
Number of Limbs with Medial Artery Calcification .....	57
